STAT 450 FINAL PROJECT

Requirement: The design should be more complex than a SRS (e.g., stratified SRS, ratio or regression estimation, cluster or systematic sampling, etc.). You are welcome to design a complex survey.

The required components:

- The objective of the study.
- The type of design, the target and study populations, the sampling frame.
- The response of interest and how it will be measured.
- How the sampling units were determined and how you will collect the sample.
- Estimate, C.I., Plots
- Conclusion and recommendation.
